

High-performance quality floors without any joints for minimizing operation cost

Lamphun Distribution Center is a 25,000m² logistic center to support other Charoen Pokphand Group business such as All Now, Makro, Lotus's and CPF Group in Lamphun.

The challenge

Challenge we face is the project owner do not want to have any joints on floor, because the aim to low maintenance to achieve minimize operation cost.

Joints are often the greatest source of maintenance problems in industrial floors. Minimizing them results in a higher quality floor requiring less maintenance, and meanwhile reduce the repair cost of forklift and extend service life.

The solution

How does our solution help solve pain points: Solution we provided are without joints result in a large, continuous surface delivery and therefore it can reduce or eliminate maintenance , and come to lower construction cost.

How does Bekaert cooperate with partners: Support on slab design and with full scale test to ensure the project consultant and project owner on load bearing capacity.

Project Specifications

Project type: Warehouse
Application type: Seamless floor on pile

Partners

Owner: CP Future City Development Co.
Design & Build Contr.: Future Constr. Co., Ltd.
Consultant: TEAM Consulting Engineering and Management PCL
Floor. contr.: Nutcon Corporation Co., Ltd.
